Abstract: The Mid County Parkway project will provide a new freeway that will effectively and efficiently accommodate regional west-east movement of people and goods between and through the cities of San Jacinto and Perris. Potential benefits from future implementation include increased accessibility for residents and businesses and the relief of traffic congestion on the regional and local transportation network. Key issues include impacts to community character and cohesion, growth-related effects, biological resources, aquatic resources, cultural resources, aesthetics, residential relocations, business relocations, traffic noise, and temporary construction effects.

FHWA will not issue a single Final Environmental Impact Statement and Record of Decision document pursuant to Pub. L. 112-141 Stat. 405, Section 1319(b) because FHWA has determined that practicability considerations (no identification of a preferred alternative in the Draft Environmental Impact Statement or Supplemental Draft Environmental Impact Statement) preclude issuance of a combined document pursuant to Section 1319.

¹ FHWA is the lead agency under the National Environmental Policy Act (NEPA), in cooperation with Caltrans.
